

NSW LEATHER CO. PTY LTD

Experienced • Progressive • Respectful

Experienced: Three generations of knowledge who understand transparency is key to our clients.

Progressive: We are aware innovation and development is fundamental to being the market leader for our clients.

Respectful: To the environment, employees, customers and the community.

ESTABLISHED 1952

We have nurtured long-term relationships with only the most reputable tanneries across the globe, who observe and adhere to responsible and sustainable practices to protect our environment.

This is a comprehensive collection of leathers dedicated to automotive, aviations & trimmers. With a range that offers perforation and embossed designs.

We have a dedicated team who will provide a consultative approach to your business and are available to help find the best suited leather for any project.

Our **environmental accreditations** are outlined in the documents associated with the below link. Simply click on the button to view these accreditations and full specification details for our entire leather range.

ENVIRONMENT & SUSTAINABILITY

For 70 years NSW Leather Co. has been involved in the leather industry and we understand the need now more than ever, to preserve our planet. It is our responsibility to the next generation.

Leather is a by-product of the meat and dairy industry, and by nature it is far more natural and biodegradable than vinyls and synthetics that try to imitate the natural beauty and supple feel of leather.

Each and every year, the leather industry saves over 73 million tonnes from global landfill through environmentally aware initiatives and regulations to protect the environment.

IN SUPPLYING THE BEAUTIFUL PRODUCTS WE DO, WE ARE COMMITTED TO: -

- **Waste recycling** - obligatory in house purification plants that can purify 97-99% of discharge and be used multiple times in productions phases.
- **Energy efficiency** using thermal, solar and renewal energy sources not only in production where the leather is made, we also are committed to a more sustainable environment and have embraced the use of solar energy at our head office in Sydney, NSW.
- **Replacement of all harmful substances** so that all our leather comply with REACH specifications. There is no Chromium VI or any solvents or substances that appear on the MRSL. We use mostly water-based materials, limiting emissions of VOCs (Volatile Organic Compounds). All partners contribute to ZDHC (Zero Discharge of Hazardous Chemicals).
- **Fully traceability** from the farms the cows are reared in to the hides delivered to you. We know where every hide originates.
- **Investing in research and innovation** that is constantly leading to reduced water, energy, chemicals used for the treatment of waste, helping to lower emissions and increased waste recycling.
- **Replacement of all diesel** with hybrid and electrical Internal transport in tanneries and warehouses.
- **Recycling** of our old samples and colour catalogues, these are given to small handicraft organisations, schools and workshops so that nothing goes to waste.
- The **use of recycled materials** in our sampling and marketing collateral, takes further step towards assisting our environment with creating a sustainable future.
- The tanneries are always striving to **reduce their waste** and to incorporate more bio-sensitive practices with their leathers. They now incorporate in many of the ranges that are produced, the use of vegetable extracts in the tanning process, such as the use of olives or mimosa's.

OUR PARTNERS ARE CERTIFIED WITH OR MEET THE FOLLOWING STANDARDS:

REACH is a regulation of the European Union, adopted to improve the protection of human health and the environment from the risks that can be posed by chemicals, while enhancing the competitiveness of the EU chemicals industry. Promoting alternative methods for the hazard assessment of substances, REACH applies to all chemical substances; not only those used in industrial processes but also in our day-to-day lives. Therefore, the regulation has an impact on most companies across the EU and it places the burden of proof on companies. It stands for Registration, Evaluation, Authorization and Restriction of Chemicals. It entered into force on 1 June 2007. Under REACH there are 3 roles:- Manufacturer, Importer, Downstream users.

The UNI EN ISO 14001: 2015 certification refers to the international standard norm that provides organizations with a reference framework to protect the environment and respond to changes in environmental conditions in balance with the needs of the socio-economic context. It specifies the requirements that allow an organization to achieve the expected results it defines for its environmental management system with a view to continuous improvement.

NSW Leather sources leather obtained from LWG Gold rated Tanneries. The Gold Rating is the maximum score of the LWG certification. The main objective of the Leather Working Group is to develop and maintain a protocol that assesses environmental compliance and corporate practices regarding sustainability by promoting improvements in the leather industry.

Blue Angel testifies to the ecological quality of the leathers sourced by NSW Leather. Blue Angel certified products better protect the environment and human health, thanks to a series of tangible benefits: -

- Less water consumption in the various production phases.
- The use of raw materials produced in a sustainable way.
- The cautious use of resources in the use or disposal phase.
- The absence of harmful effects on health and the environment because they are low in emissions.
- Being easy to recycle.

NSW Leather sources leathers from member of Leather Naturally, an association that promotes the use of sustainable leather produced globally, with the aim of inspiring and informing designers, creators and consumers about its beauty, quality and versatility.

DAYTONA

The most durable and stable aftermarket leather which NSW Leather has been running for over 15 years. Its robust, hardwearing properties are well renowned.

Daytona is a robust and durable aftermarket leather made for tough Australian conditions. With its remarkable cutting value and classic colour palette this leather represents a great leather choice.
